Profile

Dynamic IT professional with interdisciplinary knowledge in information technology; more than 5 years experience in project management and about 12 years experience in software development. Bringing proven ability to combine analytic thinking with organization and social competence; wide range of knowledge in the fields: software development, administration and technical management. I like working in a team and contributing to the knowledge and capabilities of each member. A strong pragmatic focus on the perfect solution, willingness to travel and a sense of humour round off my profile.
